[Subject: Request for Acceptance of Previously Issued Building Safety Certificate]

Dear Sir/Madam,

We are writing to address the recent communication received from your office regarding the submission of a new building safety certificate for our school.

Our school building was constructed in 2017, and we ensured that all necessary safety measures were thoroughly implemented during its construction. A structural engineer of repute certified the safety of the building. Additionally, as per the CBSE's prescribed guidelines, we renewed the building safety certificate from the appropriate government authorities last year.

We would like to confirm that our school consists of one block and it was duly inspected by the authorities during the renewal process last year. The certificate issued by them, although not explicitly mentioning the blocks, covers the entire premises. Given that the inspection was done recently and in compliance with the CBSE requirements, we kindly request you to accept the building safety certificate issued last year.

We understand the importance of maintaining up-to-date safety standards but believe that undergoing repetitive inspections in such a short period places unnecessary administrative and financial burdens on the school. We trust that the authorities' inspection and certification from last year are sufficient for compliance purposes.

We request your consideration of this matter and hope for your acceptance of the previously issued certificate.

please find attached pdf of building safety certificates issued by government and structural engineer for your reference.

Thank you for your understanding and cooperation.

Yours sincerely,

Principal
